

Tooth profile w/S-hook

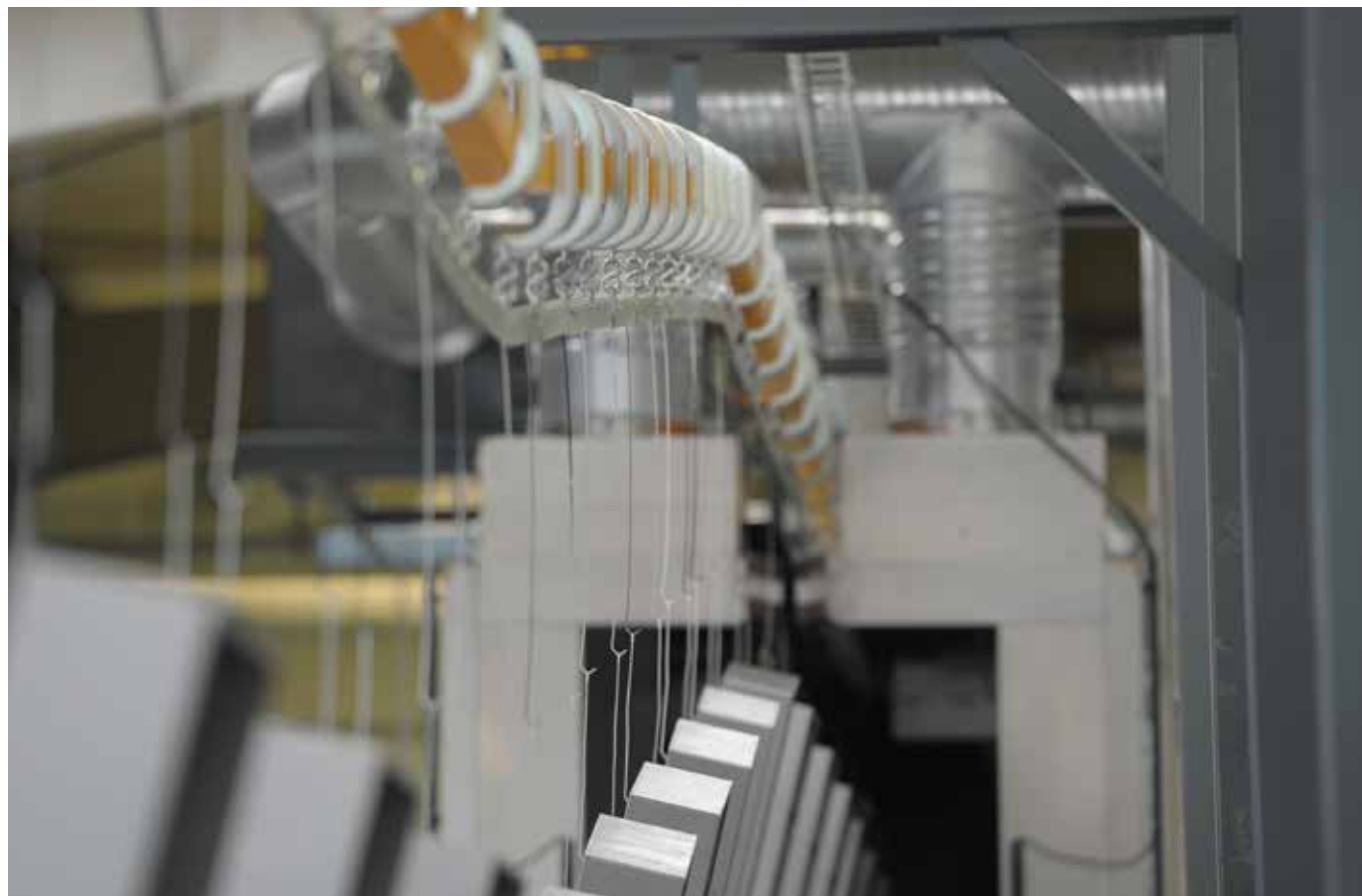

Conveyor tooth profile with S-hooks

The most common choice of option for hanging the tooth profile on the conveyor is the S-hook.

A choice of s-hooks rely entirely on the weight of the items/products to convey through the plant.

Each tooth profile attached with 2 S-hooks holds a max. weight of 80 kg.

HIGHLIGHTS

- Easy handling for operators
- Safe and flexible
- Can carry up to 80 kg
