

Chemical pumps

Chemical pumps for the pretreatment

The VMS Series pumps are ideal for low and middle dosage of chemicals.

All control and setups are done via a digital keyboard and display, and is very easy to operate.

The chemical pumps are manufactured in moulded glass with a PP housing to ensure protection against aggressive chemicals and tough environment.

They are available in different models and sizes fitting various needs of capacity and functions.

You will find technical data for a few examples here.

DATA for chemical pumps - examples:

MODEL		2001	1504	0512	0116
Flow min.	cc/h	0.1	0.37	1.11	1.48
Flow max.	l/h	1	4	12	16
Flow min.	GPH	0.00002	0.00009	0.00029	0.00039
Flow max.	GPH	0.26	1.05	3.17	4.22
Per stroke	cc	0.1	0.37	1.11	1.48
Pressure max.	bar	20	150	5	1
Pressure max.	PSI	290	217	72	14

HIGHLIGHTS

- Easy to operate
- Ideal for low and middle dosing
- Ensures stable supply of chemicals
- Available in various sizes and capacity
