

## CEANING BOOTH DS

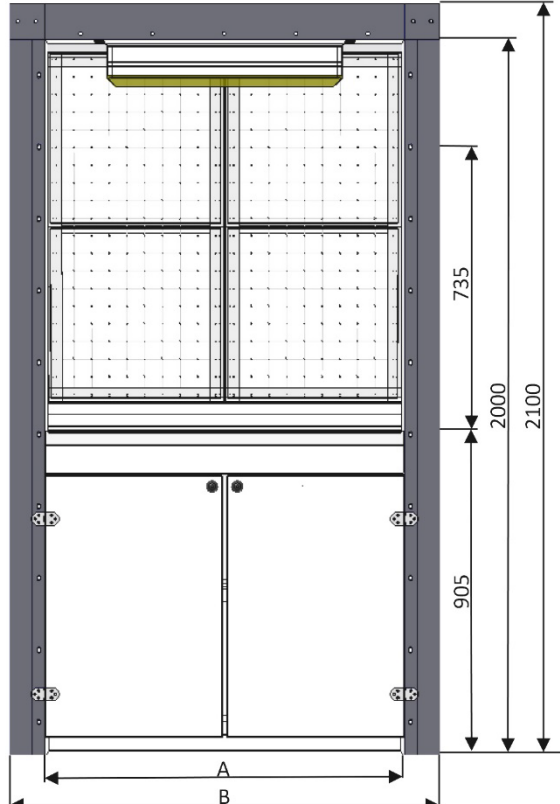

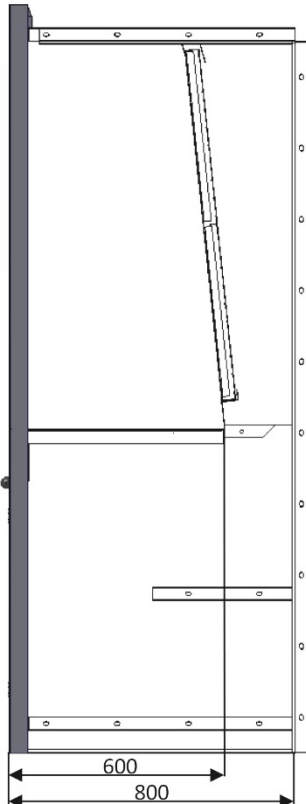

### Cleaning booth for spray guns

Providing a well-ventilated and illuminated work area where spray guns can be cleaned, the Cleaning Booth DS can also be used for mixing small amounts of paint thereby avoiding widespread dispersal of solvents throughout the premises. The Cleaning Booth DS is equipped with 3mm Plexiglas windows at eye level as well as four GR-200 filters.

For the recycling of solvents, there is a stainless steel sink with a drain cock where parts can be soaked and washed. This is connected to a vessel with a collection trap where an ingoing wash pistol is connected with the suction hose. The collection trap is mounted behind a double door at the bottom of the cabinet.

The Cleaning Booth DS-140 can be equipped with two drain locks and two washing points as optional extras.

Delivered assembled and ready painted, the Cleaning Booth DS is standard equipped with Zone 2 fittings and LED light fixtures (ATEX classification 3G/zone 2) but can be modified with Zone 1 fittings on request.
